

# Indoor Driving Obstacles/Cones

2006-2024

Mike Watts and Fiona Powell

ihdtm@mikewatts.com

## **Contents**

- ICD event obstacle diagrams
- ICD World cup style courses
- ICD Cones courses

This is a collection of obstacle, cones and worldcup courses we have used, published here for anyone to use\*.

If you use any of these, ***please*** let me know how you get on, any new ideas, improvements you have ... !

Please send me your own obstacle and cones designs and we can add to the collection for sharing (with your designer name).

Scale: At Wix each obstacle is built in an arena 21m wide and uses half the arena length (i.e 27m).

The diagrams are close to scale, except the start finish is always a little further away – 27m from top.

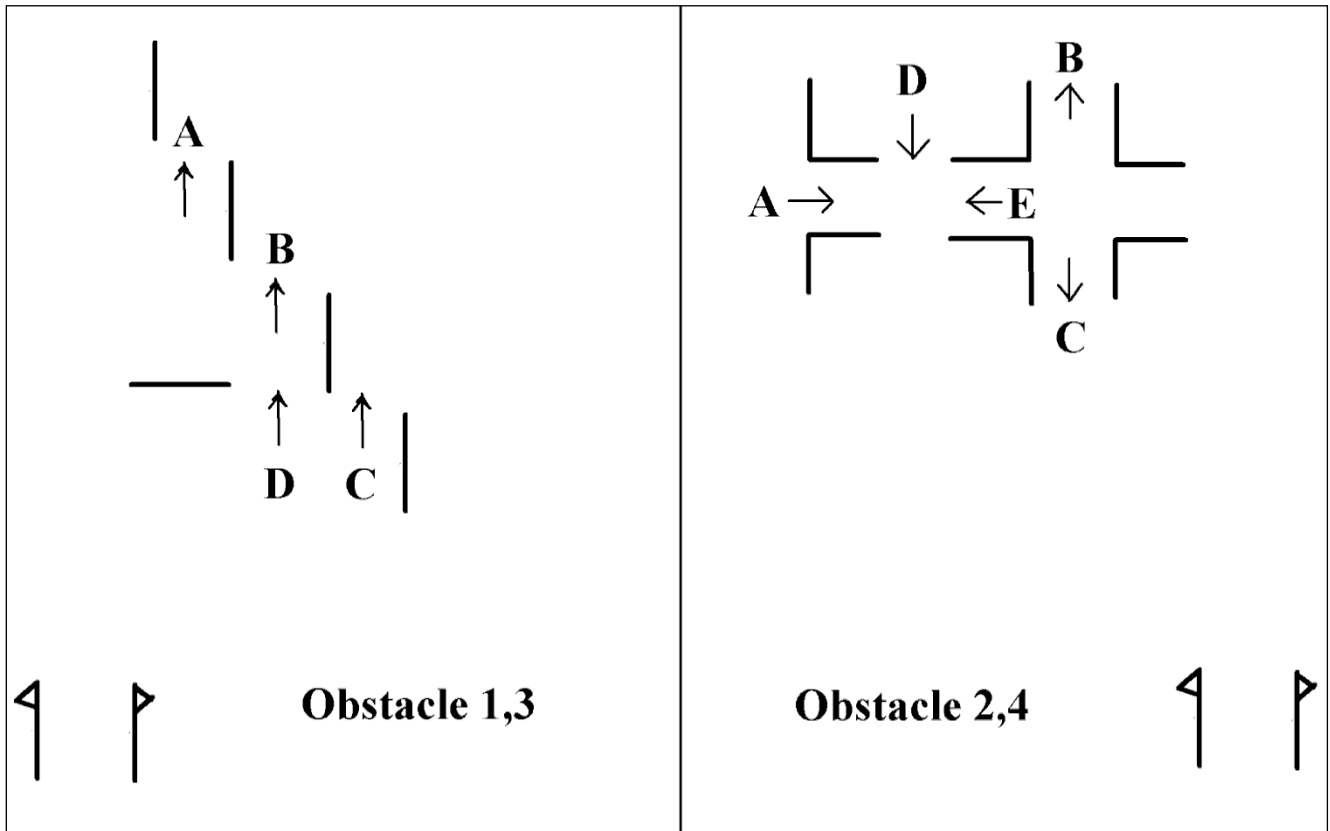

The nature of the obstacle, how it drives, depends strongly on exactly how you space the elements. Don't make it too tight.

Legal minimum gate width is 2.5m, but rule of thumb/normal minimum width is 3m. (or 4m from 2023 and larger turnouts)

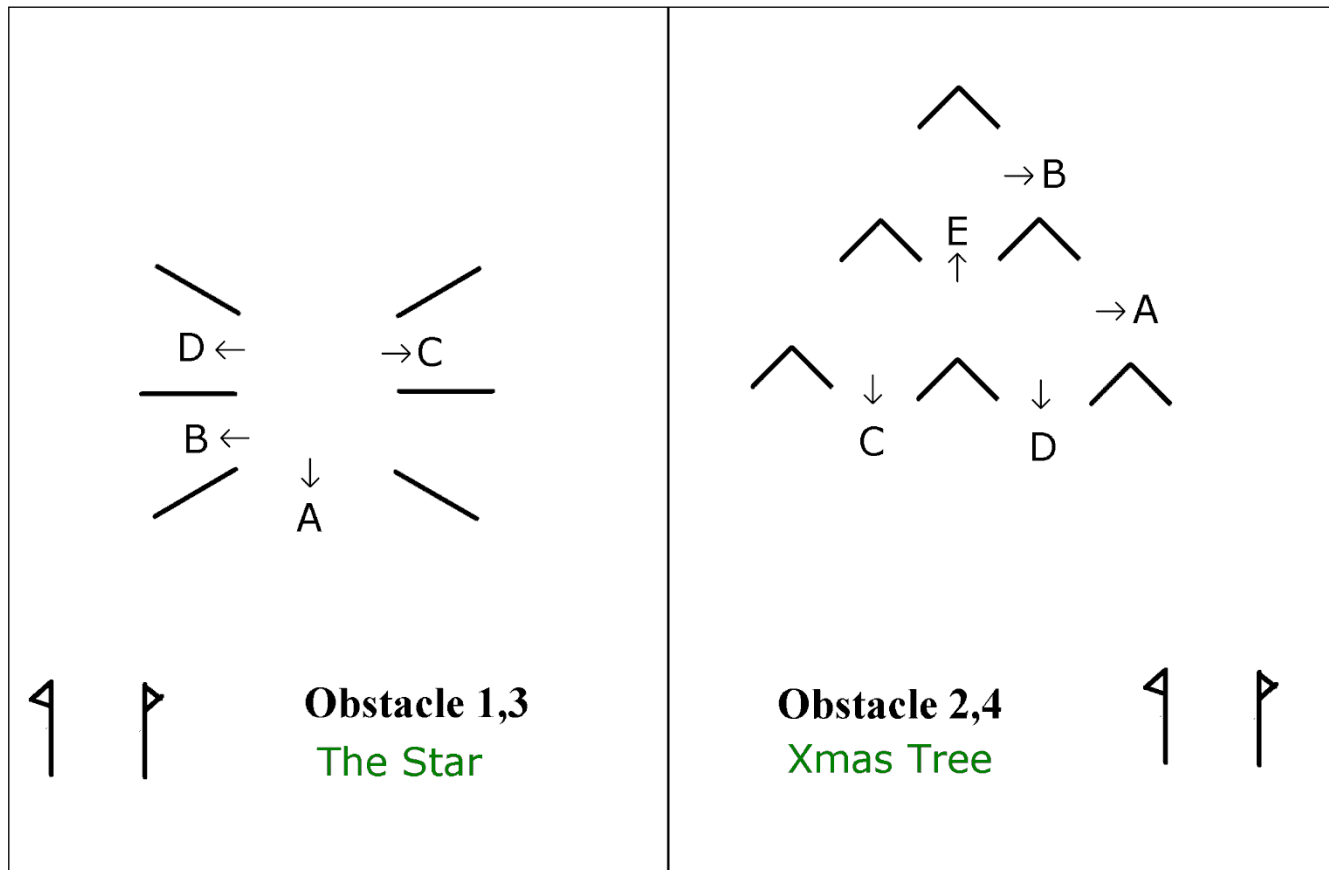

2021/24 include examples where a cones course is squeezed in around two obstacles. The cones and obstacles are still driven separately, unlike the World Cup style where cones and obstacles are alternated.

See pictures of many of these in use in competitions at [www.mikewatts.com](http://www.mikewatts.com)

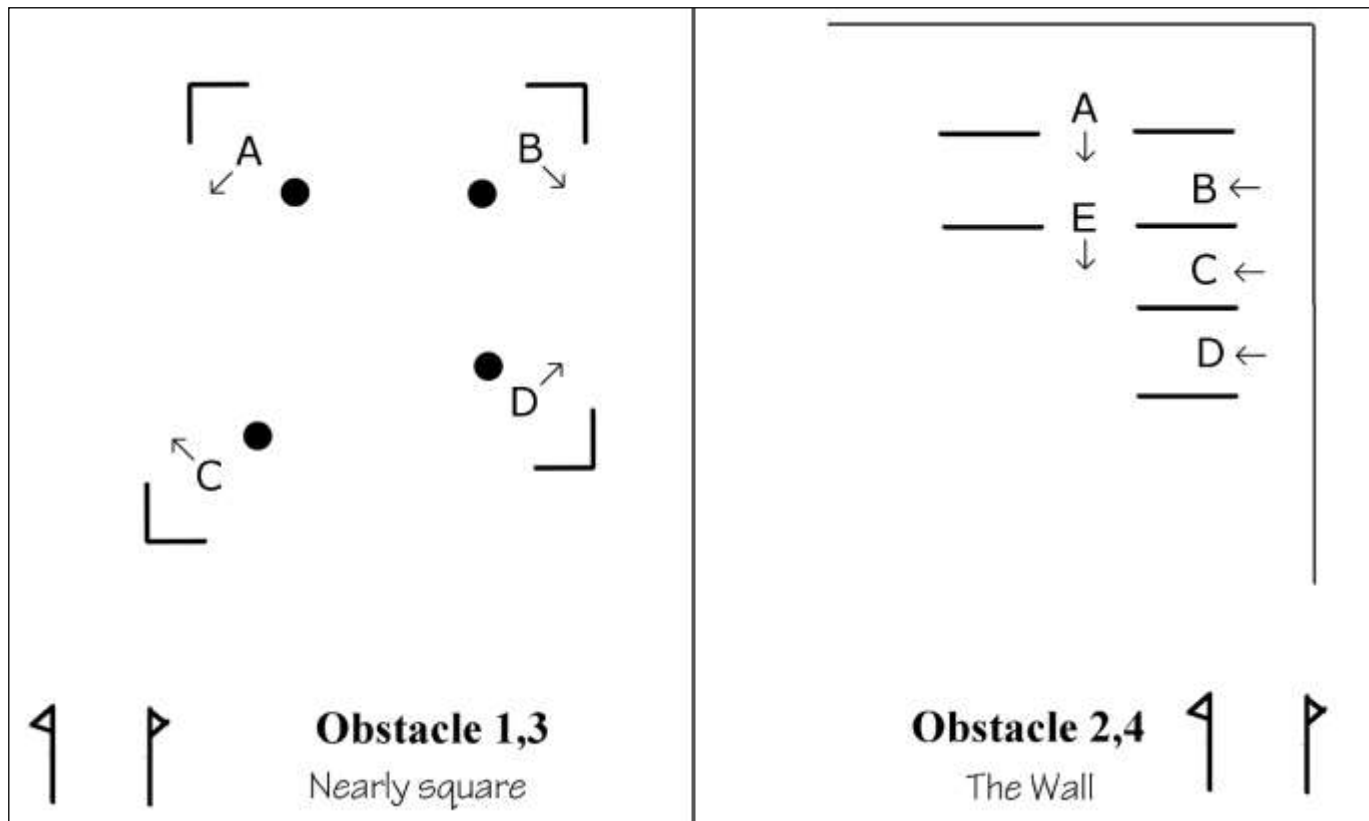

*\*The safety depends on the materials used [horse friendly] and detailed layout, ground surface, surroundings/environment, turnouts and experience of course builder, drivers, grooms, horses and stewards .....assess the risk, if in doubt, get advice.*
